MILESTONES: CAD / 3D Printing

The CAD/3D printing milestone was designed to provide students the necessary tools to:

- Navigate through CAD software
- Create designs with intermediate level geometries
- Approach a design problem in different angles
- Bring an idea to life by means of 3D printing

No previous experience is required!

Participants will attend four 2 hour sessions, in which they will have a mix of hands on experience and lectures in a creativity filled environment. In class exercises will be paired with a class project that showcases an application of CAD.
